-explanation: calculation impedance of power source the up streav network the power supply transformers as well as of the electrical lines

Problem consider a 20kv network that supplies a HV / LV substation via 2 m overhead line and MVA generator that supplies in parallel the busbare of the same substation two 1000kva parallel connected transformers euply the LV,busbar which in turn supply 29out gears to 20 motor including the one supplying motor .all motor are rate 50kw all connections cable are identical and all motor are running when the fault occurs the isc3a d up value must be calculated at the variouse fault location indicated in the network diagram.

-point A on the HV busbars with a negligible impedance.

-point B on the LV busbar,at a distance of meter from the transformer.

-Point c on the busbar of an LV su distribution board .

-point D at the terminal of motor Mthen the reverse current of the motor must be calculated at C and B .

up then D ,A

Inductance between stator winding a and rotor ,L AFA = 0,0054H ,Q
axis mutual inductance between rotor stator winding a and q axis
armortiaseur,Lakq= 0,0963 H ,the per unit system and denote rotor
-calculate procedure:
1. Determine the speed at breakdown torque synchronous in speed is
calculated from the equation n,sync= 129 f/p , r/Min where ,f
frequently,in Hz and ,P= number of poles this)
synchronisation=120(60)(1800)×4 ,at the point where the torque in
percent breakdown torque is 109,the speed in percent of
synchronisation torque is 100,the speed %, of synchronisation speed is
thus the rotor ,speed is not= 0,80 synch=0,80)×(1800)=14400trm
-calculate the hors power at breakdown
The general equation)+HP Min) /33,000f.t,lb=(torque in lb, ,n rot in
r/Min)/52521 ; 16°z,,Lb , 13 in = ift
-ho = (torque in o .in) (n rot ,r/Min)÷1,008,403,2
HP=(torque in o .in)(n rot in r/ Min)×10 .exp -6 break down,
HP = (10,50z in) (1440r/ Min) ÷10 exp 6=15,12÷10 exp -3, how =
1512 ..
- repulsion motor , 24 slot the armature ,
Slot ° (24)+2)=48 coil
ZR=(3,5×10 exo -3 WB)(576
conductor)(3600r/Min)(2poles)/√2)+60hz, (2pharh)=85,5

-calculate the AC impedance of the rotor circuit.
-inductuve is calculated XL=WL=2πfL.
Frequency,L=inductance,XL=(2π)×(60)×(36×10.exp-3H)=13,5ohm
Impedance of the rotor circuit is R+jxl=2,7+j13,6 ohm =13,9/_78.8°

- 3.10 explanation: GENERATION REGULATION:

-Ea=0,00219,power factor =0,975 ,zero
-Calculate potier reactance,XP
So=E+√3×Ia×xp , from zero power factor,.Eo= voltage at not load
E,I,S. Terminal , voltage in RD= RE+DE,, DE=√3×Ia×xp
XP= Is xp÷(VLL÷√3)=D.E÷VLL=DE÷RE=0,43Pu,
EP=1,175Pu.
-power output and power factor.
Calculate the maximum output ,power for an excitation increase of
20% for a 13,8KV ,eye ,connected generator having a synchronous
impedance of 38ohm phase it is connected to an infinite bus and
delivery ,3900A ,at unity power factor ,
-1 drawing phasor diagram, subscription indicate initial conditions ,
voltage vs ,the line -to-neutral Angle and between the phase voltage
and phase current.

2 .calculat voltage behind synchronous reactance
E=(1X,)+1X)-V.V] exo 1/2 = [3900×3,8÷1000) exp 2 -(13,8÷√3)]exp
1/2=14,54 KV
3.calcul maximum power Pnax
Pmax=3.E.V.I.X ,,sin§=1 for maximum
Power ,20% higher excitation.
Pmax = [(3)(1.2)(14,53)(13,8÷√3÷3,8=110MW
-Calculate power factor,
Flux =E.I÷Xs=14,53÷(3,9)(3,8)=0,97

-per unit Quadrature axis reactance calculate the synchronous and
substrasient per unit reactance for the quadrature axis of the machine
in the first , additional data ,for the machine are ,q-axia
armortiaseur ,self inductance L,K,Kq=0,0107H, and the ,q-axia Lak =
6,3×10 exp -3 ,
-calculate ,Law
From value obtained in the two previous,
IQ=Lq/La(base)=0,0058÷(3,37×10 exp -3)=1,72 pu.
-calculate .IQ
L.q=Law+L1=1,72+0,12=1,84
Calculate ,Lkkq and Lakq.
L.k.kq=L.k.q÷Lq(base)=0,0107÷(5,96×10 exo -3)=2,80 Pu ,
IA.kq÷(La.base)+ base) ÷Ikq(base)
=(6,3×10 exp -3)÷(3,37×10.rxp-3)(8876÷8172)=2,72pu

4)
Calcul per unit value of q-q ,axis armortiaseur leakage
inductance ,IkQ ,1kq=1k.kq-ILq=180-1.72=0,08Pu

5).calculate per unit transient inductance.
Lq=Law.Lkq÷(Law+Lkq)+L1=(1,72)+0,08)÷(1,72+0,07)-0,12=0,195 Pu
- calculate if and ikd
The quantity are ,ifd rfs ,Zsd (base)=
0,0072÷11,56=6,23×10 exp-4, and Ikd= rkd÷Zkd base ,=
0,028÷1,77=0,0158pu
-calculate field open circuit time constant,T,ok
T'd=Lffd÷Ifd=1,74÷(6,23×10 exo -4)=2793,Pu
-calculate: substrasient open - circuit time constant,
I" o/o=(I/Iko)(Lkd+lfd.ladnlfdd)=
(1÷0,00157)(0,19+(008)(6,66÷1,741)]=16.9Pu
-Calcul per unit transient and subtransion short circuit time constant
for the direct axis the direct axis armortiseur leakage,time constant ,
-calculate per unit transient short circuit time constant ,Ta
T'd=(I/FD)[Lfd+Li.los÷+Le+Lad)
[1÷6,23×10 exp -4)(0,08+(0,12)(1,66)/(0,012+166)]=308
-Calculate per unit substrasient short circuit time constant ,T" oO
1÷F.kd×[Ln+1÷(1/Lad)+(1/Lfd)+(1/L1)]
=1÷0,00158×0,19+1÷(1÷1,66)+(1÷0,08)+(1÷0,12)

- 3.calcul per unit armortiaseur leakage time constant ,Tkd,
Tkd=Kkd÷Ikd=0,19÷0,158=12.pu
I/w(base)=1÷377, Y=T÷377

-phasor diagram synchronous generator
1.determine
If the Va and V base value are equal to the machine rating ,Is base =
(MVA)×1000)÷√3kv=(100)(1000)÷√3)(13,8)=4184 ,base voltage
a ,13,8 kV ,per unit RMS , terminal voltage ,is Ei=1.0 Pu
Per unit peak voltage
Teta = U.O/$0°.P.u will be chosen ,phasor

E1=Xad,j+d=[eq-xd.is](eq-xd.is)+rid=0,819+(1.89)(0,951)=257pu
- explain, Generatie - capabilities curve :
generator , supa ability curves , supplied the manufacture is used to
determine the ability of generator to delivery real (Me) and reactive ,
(MVar) power to a network determine the capability curve in per unit
value of a generator
-characteristic : 989 KVA ,of = 0,85 synchronous reactance ,XD = 1,77
Pu , maximum value of generator internal voltage ,Emax =1,75 p.u
terminal voltage ,V= 1.9 Pu ,§= load angle and the system reactance
external to generator ,is XE=0,4 .p.u
-calculate stator limited portion stator ,limited is directly proportional
,full power output ,arc ofa circle medium ,Rs=1,9 p.u
- calcul field - limited,P=(3×V.Emax/XD)
Sin§+j(√3.×C.E.max÷Xd.cos§-√3.V.÷XD)

Explanation:-Generation rating for installation:-generation rating in
MVA = turbine rating in MW /power factor,generator for 600-
MW=rating 600Mw /0,99=677MVA.-o

3.11 Explanation: calculate generator output ,P
Po= √3×KV×IA×pf=(√3)(25)(28.000)(0,975)=1.182,125kw
-calculate generator officiency
Efficiency=power out put)÷+power output+total losses)
=1.182,125÷(1.182,125+10.910=0,99
-calculate synchronisation coefficient at rated load for the following
generator : 75.000kw , terminal voltage ,V=I×o×p×u, armature
current,
IA=I×p×u,
Quadrature axes reactance ,X2=1,8 ×pu×
Of=0,80 lagging , neglected the resistive components of armature
- calculated rated load angles §
The angle §=tan .exp -1.[xq×cos$×Ia÷(Ia×xa×sin$+V)]
Tan .exp-1[1.8)(0,80)(1.0)÷[(1.0)(1,89)(0,6)+1]=35°
-calculate synchronising power coefficient,Pr
Or=(rates kW)÷(rates load angle × 2π÷360)=(75)
(1000)÷(2π÷360)=122,780 kW/rad.

-Generation efficiency:

Determine the efficiency of generator having the same basic characteristics of the generator in the generator regulation additional data including armature full load current ,IA=28.000A ,core and short circuit losses a friction and windage ,loss ,500Kw ,from drive rotor input ,armature , resistance ,Ra=0,0011ohm phase excitation voltage a rates ,470C, excitation current for air gap line 3200A,and output voltage ,25 kV ,compute core loss from and the potier voltage So=1.175 ×p.u, loss 21000kw

-determine short circuit loss for 1.0 Pu line current ,short circuit loss =4700kw

-calculate stray current loss ,stray current ,loss =short - circuit ,loss , armature,loss =4700-862=3838Kw

- calcul power for excitation power for excitation=field voltage ×IfL =(470)(2,4)(3200)÷1000=3610Kw, IFL

-Determine e total losses :

--friction and windage : 500kw

Core loss. : 2,100kw

Armature copper loss. : 862 kW

Stray current loss. : 3,838kw

Power for excitation. : 3,619kw

Total losses : 10,910kw

-Explain: Generator grounding transformer and resistor.

-determine the size of a transformer and resistor required to adequately provide a high resistance ground system for a Wye, delta start connected generated rated 1009MVA ,26KV ,60GZ,in addition generator capacitance= 1,27 ,if man transformer capacitance =0,12 if ,generator lead capacitance= 0,01uf and auxiliary transformer capacitance = 0,024uf

-calculate generator line -to -neutrak voltage ,VL- N=(26kv)÷√3=15kv

-calculate total capacitance ,CT

CT=to+1,27+0,12+0,01+0,024)if=1,424 uf .

- calculate total capacitve reactance ,Xct

XcT= 1÷2πfcT=1÷(6,28)(60)+1,424×10 exp -6)=1864 ohm

-select ,R= XcT to limit transient over voltage during a line _to_ ground fault assume a 19,92÷0,480Kv

Transformer the resistance reflected to the primary ,is .R'=N.N×R, R' is the requirements resistor ,solve ,R=R'B.N ,,, B= 19,92π0,480=41,5

R=1864÷41,5 exp 2=1,08 ohm

-calculate transformer secondary voltage ,Vs during a line - to - ground fault ,vs = Vs = 1500÷41,5=361V.

- calcul current Is , through grounded resistor ,Is°
Vs÷R=351÷1,08=334,3A
-calcul required continuous rating ,in KVA grounds transformer rating is KVA ,= I,V, = (334,3)(361)=120,7kva.
- sele

- explain:selected short time rated transformer from ANSI standards ,a50 -kva transformer may be used 9 Min , rating is adequate,

-calculate generator line -to -ground fault current ,If , if = V/XcT =15.000÷1864 =8.05
-Power -factor improvement.
An industrial plant has a 500-hp induction motor load a 4000V, with an average power factor of 0,8 logging ,and a erage motor efficient of 90% ,A new synchronous motor rates at 3000hp is installed to replace on equivenlent load of induction motor the synchronous motor efficient determine the synchronous motor current and power factor for a system current if 80%od the original system and unity power factor
- calculate initial system rating KVA
The rating is KVA=(HP /b)(0,745/of)=(500/0,8)/(0,746/0,8)=518KVA,,n efficiency
- calcul initial system current I o
Io=0,8Ii°(0,7)(746)=597A
-neq induction - motor ,I1
I1=0,746 hob/. √3.n.pf =(0,746)(200)/√3(3)(0,9)(0,8)=299A,
- cal synchronous - motor power factor ,- PFA = 3588/40/1=0,895
-calculate synchronous motor power factor PFA , PFS =

358,8/401,1=0,895

LIGHT System for an out door area ,
Main height,
- highest illumination level produced away from a flood light location
occurs when the maximum flood light candela value ,,
-3. Determine utilisation factor.
Area ,2 mainting height (2×10m=20m)
Height (4×10m=40m)long flood light is aimed ,13/10,

X÷MH=tan @÷cosπ

-Aiming line ,
Vertical angle , in line distance , maintenance,

-Lateral distance (x)÷maintenance (MH)

-foot candles /10.00 candelas ,
Mounting height =31,6ft,
Lux /10000 candle mounting height =10m
- calculat the level illumination
Average lux = (LL)(cu)(LLD)/area =(51.00)(0,4168)×(0,9)(0,95)1(20)
(40)=22,7lx
-maximum averag Luz ,30,600w

Lumen distribution ,- isocandela , curves ,, photometric data for flood
light in out door ,agree light design

Factor to consider : level for activity luminaire.
- light -loss factor light loss factor ,
-level of illumination, extensive information on selected appropriate
-ligthing source selection cost of energy to operate light .

-coefficient of utlization (cu) the coefficient of utlization important factor ,
- deternationof illumination categories

Level

A.public space. 30lx(FC)
B.simple orientation. 50lx(5fc)
for short visit
C.working space 100lz(10fc)
where simple
visual

Common visual task visual performance task commercial residential applications recommend
----
D. Performance of visual task of high contractor and large size. 300lx
E.performance of visual task high contrast
F.performance of visual task of flow contract ,500Lx(50fc),,,, 1000Lx (100fc)

G. Performance of visual task near
3.000 to 1000lx , 300to 1000fc
---------------------------------- -- -
Point is long aiming line is located 63°,or 2MH,this point is between the 0,8 - LX and ,1.0 line ,so the value ,0,9 can be give point a is ,10° above the aiming,point of 53° this matches the isocandela
curve ,marked 400,the candela value this problem ,400, substituting , formula point a yield ,
-lux = (0,9)(400/1000)(90.000/1000)(0,88)(0,95)(1)=27,0lx
Point B,is located at horizontal angle of ,42 and the vertical angle is ,10° substitute in the formula,
Lux =(0,38)(400/1000)(90000/1000)(0,88)(0,95)(1)=11,5lx
,point c

-Roadway ligthning system:
Information already that street width is 20m the mounting height is 12m and the over hand of the luminaire is 2m the required overage maintenance level of illumination is 16 LX it necessary to. To determine the stagger spacing required to determine t staggered spacing ,require to provide the specific illumination level as well as the uniformity bof illumination with.

- explain. mounting height used in chart is 10 m to calculate the level

of illumination at any point following

Lux=[lux(from chart)](Cd/1000)(LL)/(LF)(LLF)(MHct)

-lux (from chart) =illumination in LX /100cd

-cd=candela value taken from the photometric data isocandela curves at the same horizontal and vertical angle as indicated by the chart must be corrected by dividing by 1000)

-total lumens falling on outdoors area lighting system.

```
---------------------------------------------------------
Vertical. |. Horizontal angle
Zone | 0-10|.10-20|30-40|40-50|60-70-to
---------------- ----------------------------------------

Vacancy: 17305 - Development Operations Engineer - Band N - Counter Terrorism Policing HQ

Dear tshingombe,

Thank you for your application for a new position within the Met.

To be eligible to apply for this new position, we have a set of criteria that applicants need to meet.

Based on the information you have shared so far; we regret to inform you that you are not eligible to progress with your application. Your individual answers suggest that you do not meet the application criteria.

You can read more about our eligibility criteria on our Careers Website or by reviewing information available on MyHR.

We understand that this will be disappointing news for you but would like to thank you for your interest in this position and wish you all the best for the future.

Shared Services Connected Ltd – Delivering services

to me

Dear tshingombe

Thank you for applying for an event at the Metropolitan Police Service.

We are sorry that you have decided to withdraw your application; our records have now been updated.

We would like to take this opportunity to wish you all the best for the future.

Many thanks,

Recruitment Team

Summary: Request assistance from Dept of Higher Education and Training

The National Qualifications Framework (NQF) Act 67 of 2008 mandates SAQA to provide a foreign qualifications evaluation and advisory service, which it does in accordance with the Policy and Criteria for Evaluating Foreign Qualifications within the South African NQF, as amended (March 2017). Section 29(a) of the Policy and Criteria stipulates the requirements that a foreign awarding institution must meet for its qualifications to be recognized

Field Service Engineer - UPS

26849

May 29, 2024

No Longer Under Consideration

Johannesburg, Gauteng, ZAF, 1619

Power Systems Engineering Specialist (Expert)

25412

May 19, 2024

No Longer Under Consideration

Milton, Ontario, CAN, L9T 5C3

Manager Engineering Product Design Connected Solutions

25058

May 19, 2024

No Longer Under Consideration

Santo Domingo, DOM

Field Service Engineer - UPS

26105

May 19, 2024

No Longer Under Consideration

Cape Town, ZAF, 7550

Service Centre Helpdesk Coordinator

20686

Mar 6, 2024

No Longer Under Consideration

Johannesburg, Gauteng, ZAF, 1619

Field Services Engineer - UPS

20228

Mar 2, 2024

No Longer Under Consideration

Durban, ZAF, 4017

Field Services Engineer - UPS

19852

Feb 10, 2024

No Longer Under Consideration

Cape Town, ZAF, 7550

Quality Auditor, Training program, 3rd Shift

19275

Feb 9, 2024

Processed

Rumford, Rhode Island, USA, 02916

Lead Power Systems Engineer

19197

Jan 31, 2024

No Longer Under Consideration

El Paso, Texas, USA, 79912

Product Manager - Electrical Working Training & Remote Services

18926

Jan 31, 2024

No Longer Under Consideration

Moon Township, Pennsylvania, USA, 15108

Finance Early Talent Leadership Development Program (m/w/d)

18647

Jan 31, 2024

No Longer Under Consideration

Bonn, DEU, 53115

Finance Early Talent Leadership Development Program

18817

Jan 31, 2024

No Longer Under Consideration

Budapest, HUN, 1123

Site Manager South Africa - Customer Projects

12131

Dec 16, 2023

No Longer Under Consideration

Johannesburg, Gauteng, ZAF, 1619

Engineering Technician - Mechanical

13241

Dec 11, 2023

No Longer Under Consideration

Wilsonville, Oregon, USA, 97070-8247

Lead Engineer Power Conversion

14106

Dec 10, 2023

No Longer Under Consideration

Bonn, DEU, 53115

Senior Power Electronics HW Engineer

5488

Dec 10, 2023

No Longer Under Consideration

Bonn, DEU, 53115

Mechanical Design Engineer - Electrical Vehicle (m/w/d)

14843

Dec 10, 2023

No Longer Under Consideration

Bonn, DEU, 53115

Manager Engineering - Engineering Center (Eplan) ESS EMEA

12431

Dec 10, 2023

No Longer Under Consideration

Hengelo, NLD, 7559

Senior Electrical Project Engineer

15841

Dec 5, 2023

Job Filled - Other Candidate Selected

Dublin, IRL, 4

Applications Engineer

13964

Dec 5, 2023

No Longer Under Consideration

Mascot, New South Wales, AUS, 2020

Chat transcript

Name: tshingombe

Contact number: 0725298946

E-mail: tshingombefiston@gmail.com

Gender Male

Are you a Student

Salome
Kutanda

Tue, 25 Jun 2024 12:47:51 SAST

Hello. How may I help you?

---

tshingom
be

12:50

i need advice career development n diploma engineering electrical , back log
isita certificate graduate , transcript record , applying to depatment career ,
student st peace college,, job experimental theoretical practical , career

---

tshingombe archived the chat

12:52

---

tshingombe left the following comment: good day

12:53

---

tshingombe rated the chat as good

12:53

Was your case resolved during the chat? Yes

Did the Advisor discuss a follow-up plan with you? Yes

Conversation happened at: https://www.careerhelp.org.za/

We constantly try to help and answer all questions as quickly as possible and also help to mediate between conflicting parties. Please be aware that the ECB is a Not for Profit organisation and as such we are limited by our resources and budget to help you. Please be patient as we have in excess of 7,000 cases each year and we want to ensure each case gets the time it deserves. If you are happy with the work we do for you and the industry please feel free to send us a donation. We really appreciate everyone of our contributors that help us make the electrical sector a safer. theory engineering point fixing installation infracturevinfracture Db box Diplomat evaluation career total license certificate national trade LOCATION: Division: Technology Management Services: (Pretoria) REFERENCES: TMS 36/2019 (1 post) Generic Requirements: • Applicants must display competency in the post-specific functions of the post; • Be in possession of a Senior Certificate (Grade 12), • Be a SA Citizen, • Be fluent in at least two official languages, of which one must be English; • Be in possession of a valid light motor vehicle driver's licence. Must have no visible tattoo/s when wearing summer uniform. • Must have no previous convictions or pending criminal/ departmental cases pending. • Applicants will be subjected to a vetting process which will include security screening and fingerprint verification. • Organizational skills. Computer literacy (MS Word, MS PowerPoint and MS Excel) will serve as an advantage. Additional Requirements: • An NQF 6 in Electrical Engineering or NQF 4 certificate or equivalent with minimum 2 years' experience in the field of post or National Technical Certificate level 3 (N3) in the field of Electrical Engineering light current / telecommunications (Electronics) with minimum 2 years' experience in the field of post or NQF 3 certificate with a minimum 5 years' experience in the field of the post. • Having successfully completed the following courses Radio Installation, Frequency Modulation Principles and Basic Electronics (applicable to all applicants except applicants with NQF 6 in Electrical Engineering). • Must be willing to work with heights. • Trade Test in the field of the post and/or certificate in fall arrest / rope rigging will be an added advantage. Core Functions: • To conduct repairs, installation, removals and maintenance of radio equipment for the SAPS Radio Technical Unit. • To do radio infrastructure installations at SAPS Radio High Sites. • To conduct preventative maintenance at SAPS Radio High Sites. • To work and perform operating test equipment (Communication Monitor, Signal Generator, Oscilloscope). • To analyse and trace radio infrastructure faults. GENERAL: •Only the official application form (newly developed form is available from all police station, on the SAPS website www.saps.gov.za and at the SAPS Recruitment offices) will be accepted. All instructions on the application form must be adhered to and previous criminal convictions must be declared; failure to do so may result in the rejection of the application. The post particulars and reference number of the post must be correctly specified on the application form. •Persons who retired from the Public Service by taking a severance package, early retirement or for medical reasons, as well as persons with previous convictions, are excluded. •Comprehensive Curriculum Vitae must be submitted together with the application form. •Certified copies of an applicant ID document, valid motor vehicle driver's license and all educational qualification obtained must submitted together with the application form Bid invitation receiving OTENTIAL SERVICE PROVIDERS ARE ENCOURAGED TO USE THE INDICATED URL LINK FOR THE DOWNLOAD & PRINTING OF SOUTH AFRICAN POLICE SERVICE PDF TENDER DOCUMENTS - http://www.etenders.gov.za/content/advertised-tenders/ note contractor

Research Plan Templates for: 1.1. Scientific Investigations Projects/Experiments 1.2. Engineering Type Projects and Computer Science Projects • For these types of projects, • a design process is followed according to criteria, to build and test-redesign-retest a prototype/product/solution e.g. a device or a computer code 1.3. Social Sciences Projects • Social Sciences research involves an objective and systematic method of exploring and analysing human behaviour, social issues and other phenomena. It involves collecting qualitative and/or quantitative data 1.4. Mathematics/Theoretical Projects • Mathematics projects explore quantity, structure, space and change. Starting with an observation, problem or question, make conjectures/hypotheses, prove your

claim using new or existing methods, make valid deductions and test your ideas theoretically. Your reasoning and arguments must be logical .2.2 SCIENTIFIC INVESTIGATIONS/EXPERIMENTS NAME:_tshingombe tshitadi_____

Lesson teach note: What's is nanotechnology: is NM one billion the length of matter to pir perspective, diameter average bacty 2500nm long material 100nm nano matert,,,nono scat material, involved the product manipulation nanoscale material products ,nanosciet consists discot and character, -activity fields nanotechnology, @0 years research plan research ... - the electronics industry,wath is distinct need between electrical appliances and electronics electrical appliances and t flow of charged particles electronics in this metal conductor copper wire ,found electrical cord home appliances non metallt conductor ketler ,electron ,non metallic conductor semiconductor found cellphone.. -nanoelectronics current and future applications. - origins of

nanoelectronics: ,100 atoms , - computer hips semiconductor industry: CPU ,central pro easing units found computer, transistors embedded in silicon, calculatioy per second required keep ,replaced out data technology tubes 1960 s , accordiy to Moore's low named after ,PC transistor ,45 NM ,process 47 million nanoscy transistor distrt accross 26 mm ,compone computer,, Components found quick retrial storage data volaty data abscen d use carbon nanotubes , computer switch data retention,data recovery during power cuts, - molecular electronics: decrease in size components molecular emerge task performance ,capacitors in electronics device ,capacitor store information, molecular been investigated act incredibly single electron . - organic light emitting diodes OLEDs : television and computer monitor ,electronic device Thea days particularly handled device mp3 player ,ligth emirtur ,OLED organic light. Emitting diode 100nm packed betwt conducting film called electront film voltage causes energy ,compare OLED ,screen film, product, - touch screen : technology as found in many table ,palm computer ,smart phones and news laptop,works , digital signal to control device interwar , layering of conductive film of indium tri oxide Ito , which conductor relay the ,x- y coordonne to processing components of the device ,smart ,ITO , technology. 1 nanowire can produced to high conductive transparent subnano wire network allowt hegher screen brightness ,with option of producing flexible screen Ito film, - improvement batteries: Devet in battery,lio batteries ,smart phone .. - risk and safety issue: unique physicochemical properties of nanomaterial electronics industry , safety humait,nano party,microsct,mass ratio risk asst , hazardous nanopt,national occupation health ,incorporate. - key issue to consider : renewable water energy have lagged ,, chip manufacture capabilities. - future risk assessment: The future nanotechnology in the electronics industry: - conductor,:material that can transmit heat ligth ,electrical charge in case electrical conductor electrical conductivity mesure of electrical current move through material it can see. As opposite of resistance, - semi conductor : a material that can conduct electricity.under specifical circulum voltage current flowing through common material . - led technologie: ligth emitting diode are semie conductor device emit light as current from anode to cathode .to cathode energy from of photon ,is release electron through the led device bprocess called electroluminescence, - transistor , semiconductor terminal current flowi between b, -capacitor ,an electronic components store electrical charge consiste two conductive plate separate , - electrodes , the anode is the electrode oxidation reaction takes place reduce, - graphene. Two dimensional one atom carbon atom bonded hexagonal the crystalline alloyrip structure a pure element ,pencit lead ,carbon nanotubes,hallow cylinder consistent,nested comprised of carbon atoms ,spherical carbon fulleren composed entirely carbon atom in bKk shapp also called buckbakk and buckmnjsterful,they commonly consist 60 or 79 carbon ,physicJ property , of substance relating to both it's physical chemical. -Metering screen ,ITC manufacture nanotechnology transmission component automate

Professional
of Electrical (Generation) Duvha Power Station Position : Snr Engineer Prof Electrical Vacancy type: External/Internal Task Grade : P16 Area of Speacialization : To provide a specialist engineering service to Generation

power stations. Department : Engineering (Electrical) Business Unit : Duvha Power Station Location : South Africa (Mpumalanga) Reference Number : 2024051401NM/DVP Closing Date : 5/31/2024 Minimum Requirements • Qualification(s): • BSc/BEng in Mechanical/ Chemical/ Electronical/ Electronic/ Mechatronic/ Computer /Civil/Metallurgical/Industrial Engineering at NQF8 with 480 credits • Professional Registration Body: Engineering Council of South Africa (ECSA) as a professional engineer • Related Minimum Experience: 4 Technical experience and engineering related technologies. Skills and Competencies • Leadership Entrepreneurial mind-set Ability to build effective relationship Coaching and mentoring • Behavioral Strong drive to learn Results and delivery focused Integrity Professionalism Safety consciousness • Knowledge Related technologies Design codes and standards Engineering theory Relevant processes, procedures, policies, guidelines and legislation Engineering design • Skill Technical problem solving Analytical Cost analysis/economic evaluation Communication Presentation Technical report writing Key Responsibilities • Resolve complex integrated engineering problems. • Validate and integrate life cycle plans for the plant. • Provide specialist engineering advice/assistance. • Manage engineering projects/modifications. • Perform technical and financial evaluations.

foreigninstitutions <foreigninstitutions@saqa.co.za> Mon, Apr 29, 2024 at 8:04 AM To: "tshingombefiston@gmail.com" <tshingombefiston@gmail.com> Dear tshingombe The purpose of this foreign institution's enquiry service is to give some direction regarding accredited and non-accredited foreign institutions. Please go to the following link: https://www.dhet.gov.za or access SAQA's searchable website database, the link is https://regqs.saqa.org.za/search.php?cat=qual for information pertaining to the accreditation status of South African institutions and their qualifications. Kind regards Authentication Services SAQA The National Qualifications Framework (NQF) Act 67 of 2008 mandates SAQA to provide a foreign qualifications evaluation and advisory service, which it does in accordance with the Policy and Criteria for Evaluating Foreign Qualifications within the South African NQF, as amended (March 2017). Section 29(a) of the Policy and Criteria stipulates the requirements that a foreign awarding institution must meet for its qualifications to be recognised. _____

Request assistance from Dept of Higher Education and Training Inbox itsmprd@sita.co.za <itsmprd@sita.co.za> Tue, Mar 19, 12:52 PM to me Dear Tshingombe Fiston, We are pleased to inform you that your reported Incident has been resolved. Reference No.: INC000025277051 Summary: Request assistance from Dept of Higher Education and Training Your reported Incident has been resolved with the following resolution: The N3 statement of results for 2100002023812 for the 2023/11 exam was released and sent to SHALOM TECHNICAL COLLEGE on 01/02/2024 waybill number 080057034873 (SkyNet couriers). Candidate does not qualify for a certificate as he did not pass all subjects. For a diploma to be awarded (as per the complaint), a candidate must achieve N4, N5 and N6 certificates and also have the relevant experiential work, then submit the application at the college. This candidate does not qualify for that. Complainant was responded to via an email. Please do not hesitate to contact the Service Desk should there be any further questions or inquiries regarding your Incident. Please quote your assigned Reference Number. Yours sincerely, Service Desk INC000025277051 PHL enquiry Inbox Nhleko, Gugu <Nhleko.G@dbe.gov.za> Tue, Mar 19, 12:39 PM to me Good day The DHET has received the below enquiry Kindly note that

according to the records for this profile 2100002023812, the results for 2023/11 were released and sent to SHALOM TECHNICAL COLLEGE on 01/02/2024 waybill number 080057034873 (SkyNet couriers). Candidate does not qualify for an N3 certificate as he did not pass all subjects. For a candidate to be awarded with a diploma (as per the below complaint), they must achieve N4, N5 and N6 certificates plus relevant work experience then then may submit the application at the college. Regards Gugu Nhleko Helpdesk

Way, Redmond, WA 98052 USA On Tue, Mar 12, 2024 at 2:52 PM tshingombe fiston <tshingombefiston@gmail.com> wrote: Turn on more accessible mode Skip to main content Turn off Animations Together Moving Post-School Education and Training Forward • Home • About Us o Minister o Deputy Minister o Director-General o Office of the CFO o Corporate Services o Planning, Policy & Strategy • Universities • Vocational Education • Community Education • SETAs • Skills DevelopmentCurrently selected • Media Room • Resources • Contact Us Isita back log project : Reference ; Certificate backlog: SITA, DHET, Umalusi; with Deputy Minister Higher Education, Science and Innovation 18 February 2020 Chairperson: Mr M Mapulane (ANC) Share this page: Meeting Summary DHET explained that certification backlog is defined as all eligible candidates who met the certification requirements but were not yet issued with certificates within three months from results approved by Umalusi. It reported to the Committee on: • Progress and status of the certification backlog statistics • Key obstacles to eliminating the certification backlogs • Certification backlog Roll out Plan aimed at addressing the obstacles • Update on progress of the new Integrated Exams IT System (IEITS) • Challenges experienced in the development and deployment of the IEITS DHET updated the Members on the Integrated Examinations Information Technology System (IEITS) that the DHET has been working on with a private service provider. Currently, system requirements and specifications for NC(V) L2 and NATED N4-N6 examination process have been documented and tested with the user community and Umalusi. The focus is now on the finalisation of the interfaces with key stakeholders such as Umalusi, SAQA, SITA printing bureau, Department of Home Affairs, Department of Labour and other departments. The deployment of the new solution was planned to be implemented in a staggered approach per qualification over four months to ensure business continuity. It is envisaged that the deployment will now commence in August 2020. It has been moved from June to August due to comprehensive quality gates for Functional Acceptance Testing (FAT). SITA informed the Committee that backlog reduction will be ramped up in the next few weeks. Besides the technology, SITA will appoint a dedicated programme manager with focused programme resources that will be cross utilised and rolled over to work on activities where quicker reduction benefits can be achieved. There are dedicated DHET and SITA officials that will be allocated to the Backlog Day Zero programme. There will also be swift dataset turnaround times by all stakeholders. SITA projected that there will be about 80% reduction of the backlog by 30 June 2020. Looking at Phase One, this target would be achieved but it will certainly be complex. SITA required steady collaboration between DHET and Umalusi to make this possible and each stakeholder has been assigned its role in the business model. Umalusi reported that it was at the end of the value chain amongst the stakeholders and therefore not responsible for the backlog. Its mandate is solely providing quality assurance and certification of datasets submitted by

DHET. If the datasets submitted were correct, its turnaround times would be reduced significantly, otherwise the datasets are sent back for the colleges to correct. Members asked how long the DHET has been using the 12 examination cycles and if it was possible for this to be reviewed; who exactly was responsible for the backlog; outreach campaigns on the certification process undertaken; why the CSIR was not appointed for the development of the IEITS; if SITA had an innovation partnership with CSIR; Umalusi turnaround times for consolidation of datasets; reasons for the seeming increase in backlog statistics; colleges failing to provide the data for certification; challenges in the legacy IT system; and if exam paper leakage had been resolved. Members wanted to know who was responsible for the development of the IEITS; if DHET had capacity to deal with the data from Community Education and Training (CET) and TVET colleges for migration to SITA and Umalusi; why SITA was placed under administration; if SITA had the capacity to handle the Day Zero commitment and exam cycle turnaround times; if consequence management has been implemented for those responsible for the backlog. Members were not happy that the stakeholders had taken so long to solve the certification backlog and asked why the service provider contracted to develop the new system had taken five years. However, there was satisfaction regarding the tangible commitments made and the timeline put in place to reduce the backlog. Meeting report The Chairperson noted that the Committee had visited the State Information Technology Agency (SITA) two weeks previously to get a sense of the certification backlog. The Committee and SITA agreed that answers would be provided today, particularly when Day Zero will come for the printing of certificates. The newly appointed SITA Administrator is also present and that is appreciated. SITA had been placed under administration since the start of the year. Certificate Status: TVET, CET, Private Colleges: DHET briefing Ms Violet Tshetlo, DHET Chief Director: National Examinations and Assessment (TVET, CET and Private Colleges), explained that certification backlog is defined as all eligible candidates who met the certification requirements but were not yet issued with certificates within three months from results approved by Umalusi. Thus anything after March constitutes a backlog for exams written in November/December. The Department runs 12 examinations cycles in an academic year. November and December are peak months for the certification process. She reported to the Committee on: • Progress and status of the certification backlog statistics • Key obstacles to eliminating the certification backlogs • Certification backlog Roll out Plan aimed at addressing the obstacles • Update on progress of the new Integrated Exams IT System (IEITS) • Challenges experienced in the development and deployment of the IEITS. The statistics fluctuate due to the following reasons: - SITA is busy refining the scripts and system certification backlog. - Instability of the examination information system to process the eligible candidates for certification. - 2019 August exam cycle outstanding certificates have been included in the backlog totals as they now meet the certification backlog's criteria -

Candidates who had outstanding raw marks in the previous report to Committee which have since been summated by TVET colleges who are now eligible for certification are included in the totals - Candidates who had irregularities in the previous report and have since been cleared by the irregularity committee and now eligible for certification are included in the totals DHET spoke about the new exam system, the Integrated Examinations Information Technology System (IEITS) that it has been working on with a private service provider. Currently, system requirements and specifications for NC(V) L2 and NATED N4-N6 examination process have been documented and tested with the user community and Umalusi. The focus is now on finalisation of the interfaces with key stakeholders such as Umalusi, SAQA, SITA, Print Bureau, Department of Home Affairs, Department of Labour and other departments. The deployment of the new solution is planned to be implemented in a staggered approach per qualification over four months to ensure business continuity. It is envisaged that deployment will now commence in August 2020. It has been moved from June to August due to comprehensive quality gates for Functional Acceptance Testing (FAT). SITA commitment to Backlog Day Zero and its role in the New Exam System Mr Vernon John, Head of Department: Administration – Acting at SITA, reported that the pace of reduction will be ramped up in the next few weeks. It will look much better due to the revised approach that has been adopted. SITA's approach included a multi-face approach with phase one looking at data analysis alignment. The phase 2 focus will be more on deep data analysis and cleansing, using a more modern technology. This is the work that will be done outside the historical system. Besides the technology, SITA will appoint a dedicated programme manager with focused programme resources that will be crossed utilised and rolled over to work on activities where quicker reduction benefits can be achieved. He noted that not everything will be resolved by the system and records that cannot be resolved by the system must be resolved through business solutions. The first prize will be Backlog Day Zero is achieved before the new system is implemented. There are dedicated DHET and SITA officials that will be allocated to the Backlog Day Zero programme. There will also be swift dataset turnaround time by all stakeholders and for resolving candidate records that have not been approved by Umalusi. [See slide 7 for a target timeline diagram on Backlog Day Zero] SITA projected that there will be about 80% reduction of the backlog by 30 June 2020. Looking at Phase One, this is going to be achieved but it will certainly be complex. SITA requires steady collaboration between DHET and Umalusi to make this possible and each stakeholder has been assigned its role on the business model (see slide 12 for DHET, SITA and Umalusi responsibilities). The role of SITA in the new system includes: - Providing advice and information on the current exam system to DHET service provider - Extracting data from current exam system and make it available to DHET service provider to port it to the new exam system - Hosting new exam system on the SITA cloud infrastructure, and - Change

management and training services. SITA will not be rendering services such as system maintenance and enhancement services and functional application support services. However, SITA will ensure that there is proper governance at the ground level. SITA will report on a monthly basis to provide updates on the reduction of the backlog certification as Day Zero is looming. In conclusion, Mr John said that SITA executives are committed to reducing the backlog in collaboration with DHET and Umalusi. The Chairperson appreciated that they were now getting a sense of the commitments and Day Zero has now been announced and the Committee will be monitoring the status. My Luvuyo Keyise, SITA Executive Caretaker and Accountability Authority, added that there are now 33 dedicated technical resources to get the job done. There is a new software solution which is basically an easier database to get the work done for DHET to stop talking about the legacy system. The data from the legacy system will now be migrated to the new database to clear the backlog. The commitment is that at least minimum two weeks before going live with each module, the backlog should have been cleared. This is because going live on the new system with a backlog will mess it up. The commitment is minimum two weeks but it could be a month or two months earlier. That is the monthly reporting that will be provided through the Department. The additional technical resources and the new database will make a big difference. Umalusi on certification Prof John Volmink, Umalusi Council Chairperson, noted that there had been some improvements in the past year, particularly in the quality of the question papers as well as the improved preparedness of the markers. This led to a better engagement during the marking guideline discussion. On the certification mandate, Umalusi issues certificates to all deserving candidates. To this end each certificate must be issued with correct information. The grace period is allowed after the results have been released and during that period a candidate can enquire on their marks and re-checking of the scripts can take place and consolidation done to ensure that the correct marks are captured. It is after this process that certification process takes place. In conclusion, Umalusi has entered into a new service agreement with the Government Printing Works to provide Umalusi with certificate background paper for the period up to 2021. So far, Umalusi has received 500 000 certificate background papers for and it is expecting another 500 000 at the end of February. The order for 2021 has already been submitted. There are some challenges with some private colleges that have not been able to pay Umalusi for the certificates. These private colleges are not part of the backlog statistics. Individual candidates have an opportunity to pay Umalusi directly to receive their certificate. To resolve this problem, the college registration fees should include the certification fee to ensure students are not disadvantaged by the college being in arrears. On the certificate backlog, Dr Eva Sujee, Umalusi Senior Manager: Qualifications, Certification and Curriculum, reported that Umalusi processes datasets when they are received and so there is usually no backlog on datasets received. Dr Sujee

stated that Umalusi must protect and ensure the integrity of the qualifications on the National Qualifications Framework (NQF). Stringent quality assurance measures are in place to ensure the quality of data. Umalusi will continue to process and quality assure all requests for certification with due diligence. Umalusi is committed to support DHET and SITA in solving the problems preventing the certification of candidates. The Chairperson noted that the situation is now much better than when the Committee visited the SITA offices two weeks ago. He felt that the Committee was now getting clear answers on when Day Zero will come to fruition and how that process will be achieved. He thanked the SITA Administrator for the work that has been done so far. He would like DHET to give assurance that come March and August 2021 the system will be deployed. He was worried that the system has been under development for a long time. It cannot take five years to develop a system that is bespoke for the certification backlog. He did not understand why it was delayed so much. The Committee had scrutinised the Legacy Report of the previous Portfolio Committee. That committee was also concerned about this matter. He sought a firm commitment from the Department and advised that the service provider should be made aware of this so that there are no delays from the service providers' side. Discussion Ms J Mananiso (ANC) asked how long DHET has been using the 12 examination cycles and if it was possible for this to be reviewed. It has been identified as leading to the backlog. On slide 6, SITA has assisted in addressing the backlog challenges but there is misalignment in the presentation about who exactly is responsible for what. On slide 7, it seems DHET is good at identifying problems but it moves at a very slow pace to resolve the problems. On slide 8, memos have been issued to colleges but it is unclear how the backlog will be dealt with at college level. There is a lack of outreach programmes and marketing to spread the word that certificates are available when dealing with the backlog. She asked if DHET had approached the CSIR when procuring the IT system. She asked if there are any partnerships with CSIR insofar as innovation. To Umalusi, she was concerned about the turnaround time for the consolidation of marks and asked about the turnaround time. Mr P Keetse (EFF) said a disruption is when a learner or student fails to get their certificate for 25 years. There are new interventions that have been commanded but what often happens is that the officials coming to Parliament are not the same officials that are on the ground. Members should not be undermined in terms of knowing what actually happens on the ground. He questioned the capacity and its effectiveness to reduce the backlog. Based on the statistics, it seems that it has increased instead of decreasing. This is clear from the statistics provided. Members were informed that has the capacity to print one million certificates in a day provided that DHET has provided the data. If that was the case, he did not believe that the backlog would have been a problem if the officials were being honest. He asked which colleges were not providing the data required by DHET so certificates can be printed. On the legacy system, he asked if

the problems with the system were systemic and how it is affecting the backlog. Umalusi has come to the Committee before and submitted there was leaking of exam papers in TVET colleges. Mr Keetse believed this problem is still on-going. He asked to what extent paper leakages have been resolved, if it has been resolved? Lastly, there should be a thorough diagnosis of where the problem really is. From the presentations, there is no accountability and clarity on from where exactly the problem comes. Officials were being 'wishy-washy' about the truth. Mr B Nodada (DA) suggested that the Committee should invite Resolve IT to ascertain the delays in the implementation of the system. There are TVET colleges that have complained at ground level about the IT systems that they use to capture data. We speak of the Fourth Industrial Revolution but yet government departments cannot get the basics right such as system migration of data from one stakeholder to the other. Entities should not give the picture they think the Committee wants to see. The Committee needs to be told what the real problems are so that the next time the entities come, the Committee is able to scrutinise them based on the real problems previously presented and if solutions have resolve those identified problems. He asked about who is responsible for the examinations IT system. Does DHET have the internal capacity to deal with the certifications that come from CET and TVET colleges for processing before going to SITA and Umalusi? He asked Umalusi what the backlog is to consolidate the certification based on the records that it keeps since 1992. The same question applied to SITA. He wanted to know why SITA was under administration and if there is capacity in ICT processing, primarily human capacity, to handle the four examinations cycle within the three months that had been indicated. Lastly, what consequence management from all the stakeholders (DHET, Umalusi and SITA) has been implemented as far as where we are with the backlog? DHET Response Ms Aruna Singh, DHET Acting Deputy Director-General: Technical and Vocational Education and Training (TVET), said that the cycle has been in operation for a long time, as long as the qualification has been around. The only new cycle or qualification is the National Certificate Vocational. DHET has managed this over a long period of time. On the communication and notification about certificates becoming available, this information is publicised where the interventions affect particular stakeholders. For example, DHET would publicise that students should go to the examination centres to get their certificates as opposed to the college head office, because the process requires you to go to the exam centre. The reason being is that doing this through colleges has borne a big gap, in some instances. Due to the lack of communication by colleges, DHET has been informed that some certificates have been at the exam centres for up to six months. Therefore, it is critical that the communication channels amongst the stakeholders are strengthened because it ends up affecting the students. On the IT system procurement, even if the CSIR wanted to come on board it would have to do so through the bidding process due to the magnitude of the project and its

cost. It went out on an open tender process and the CSIR was also eligible to bid. In the November 2019 examination, there were no exam paper leakages and this was publicised. As for sharing the blame, it is important to note that this process does require everybody to work together. However, between DHET and SITA, we can accept portions of the blame. Even if one segment of the process works perfectly, you would not get a certificate until the entire value chain had no loopholes. Ms Tshetlo replied that DHET does have human capacity and has a dedicated team that will run with the qualification and they deal with the regions. That capacity is adequate for the current examinations and the current qualifications. However, that may not be the case in the future if more qualifications and examinations are added without adjusting the available capacity to cater for that. As for CETs, the General Education and Training Certificate (GETC) qualification is run on an agency basis at the provinces and there is support from SITA. It is a collaborative effort between DHET and the SITA. The ICT system for DHET was supported by SITA and it was based on the SITA main frame. It is run from SITA. On the DHET procurement of the IT system, it was done through an open tender assisted by SITA. The service provider that was sourced came through that process. SITA Response Mr Keyise explained the increased certification backlog statistics on slide 6 of the DHET presentation, particularly on the National Accredited Technical Education Diploma (NATED): Engineering Studies. There was a 1 858 increase in the backlog. However, the statistics do not show within the four month difference when the date was extracted, how many of the new data was received and how many was reduced. The reduction, however, was not shown. As for partnering with CSIR, both SITA and CSIR will soon come to the Committee and brief it on some of the innovative initiatives that the two are planning to partner in. CSIR has research capacity and SITA will report to the Committee on the research work planned ahead. It is indeed true that the systems in DHET, TVET colleges, SITA and Umalusi do not really talk to each other. There is no simpler integration of the government systems. The business rules have not been cleaned yet in terms of making that possible; it is a legacy problem of government. Old systems are used but the business rules have not been changed to make life easier and we are now reactive in solving the challenge. It is not being solved holistically to ensure that once it is fixed from a departmental level, it trickles down to the TVET college level. We are now going to move data from a legacy system into a new system that fits with the technology advances of today. This means that you can process the analysis of that data quicker and it can be done with minimal resources. Broadly the partnership with CSIR speaks to applied research on 4IR in simple terms. We want to partner and see how we can develop a localised ICT research. SITA will also be working with CSIR to build a cyber security academy and ensuring that there are internal skills based in government to refrain from going to the private sector all the time. On Resolve IT, SITA will also be analyzing why it took so long for the service provider to develop the system. SITA is not responsible and it is not playing

any role in the implementation of that system. The system implementation is between DHET and Resolve IT. SITA's job is to ensure that the data is cleaned and managed and moved into that system. SITA will avail itself in assisting to monitor the new system implementation in addition to the 33 technical staff that SITA will be utilising. There is no contractual relationship at this point. On SITA's capacity to print a million documents a day, the challenge is not on the printing side but receiving the data or results from the TVET colleges. SITA has given Umalusi a five-working-days turnaround time so that it can move ahead with the process. Mr Keyise replied that he was not the right person to respond to why SITA was placed under administration. He was appointed after the fact but he would inform the Minister that the Committee had asked why the Agency was placed under administration. On consequence management at SITA, this will be looked into but not for the implementation of the new system because SITA is not responsible for that. Umalusi Response Dr Mafu Rakometsi, Umalusi Chief Executive Officer, said that advocacy is something that is continuous at the organisation. He assured Members that he runs road shows throughout the country as well as career exhibitions. The Council receives a report on this matter of how Umalusi executes its advocacy campaign or mandate. On the reduction of the turnaround times, the challenge is always about errors contained in the data submitted to Umalusi. If the data could be correct, the turnaround times would be significantly reduced. When it is not correct, Umalusi sends it back with reasons why the certification could not proceed. The leakage of question papers is mainly an issue that ought to be dealt with by DHET not Umalusi. Umalusi is not the custodian of the question papers and it provides only quality assurance. Also Umalusi cannot verify a student unless the correct data has been submitted. Umalusi verifies the integrity of the data submitted for certification and it is at the end of the value chain of the certification process. Umalusi relies on the quality of data that is submitted by the DHET and SITA. The organisation does not participate in the Department's operations or implementation of the system. Its responsibility is to certify the data submitted by DHET; therefore, it cannot make confessions about matters it is not responsible for. Deputy Minister Response Mr Buti Manamela, Deputy Minister of Higher Education and Training, said that addressing the certificate backlog is at the top of the agenda. DHET is always inundated about the delays in issuing the certificates. Secondly, DHET handles a number of examinations per year, as opposed to the Department of Basic Education which handles only one examination. So the point around Day Zero means that we can only address the backlog we have since the 1990s. However, there are challenges were people think they qualified and demand to be certificated. This is encompassed by all the other challenges. Continual reports will be furnished to the Committee based on the set targets as we approach Day Zero. The Chairperson said that he was happy with the Day Zero commitments. The Committee will hold DHET accountable for these commitments. He would have liked to see DHET making similar

commitments as SITA had. The TVET and Community Education and Training (CET) colleges are the most neglected in the Post-School Education and Training (PSET) sector. The universities seem to be the top priority.
